

Six footprints, one drawing scale

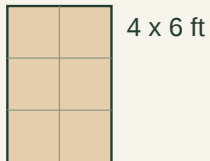

READ THE SCOPE / a smaller rectangle may exclude the outdoor area you still need

3-5 Chicken Fixed A-Frame

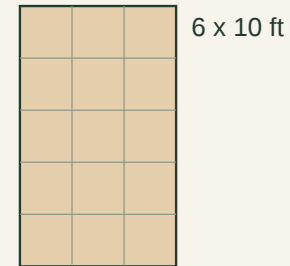

Coop + integrated run
[Reference Design Sheet](#)

4-Chicken Compact Coop

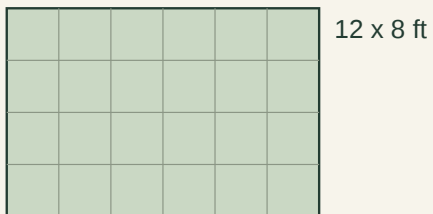

Enclosed coop only
[Reference Design Sheet](#)

6-Chicken Coop + Covered Run

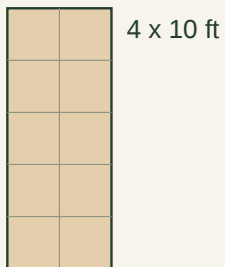

Coop + integrated run
[Reference Design Sheet](#)

8-Chicken Walk-In Coop Plan

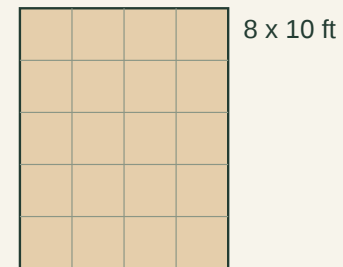

Coop + integrated run
[DIY Build Plan v1.1](#)

8-Chicken Tractor Coop

Mobile parking only
[Reference Design Sheet](#)

10-12 Chicken Shed-Style Large Coop

Enclosed coop only
[Reference Design Sheet](#)

Grid: 2 ft / rectangles share the same scale. Door routes, roof projections and service space are additional.

Choose the scope, then measure your own site

Names describe published design directions, not a flock-capacity approval. Review usable indoor/outdoor area and management conditions separately.

Direction / included rectangle	What you can take away	Care / next field check
3–5 Chicken Fixed A-Frame / 4 × 8 ft overall shelter + integrated-run envelope	Reference Design Sheet: layout and daily-use direction; no complete construction package.	Compact footprint, with extra attention to low-edge reach and clean-out posture. Keep working room outside both exterior access points; this rectangle does not assign service clearance.
4-Chicken Compact Coop / 4 × 6 ft enclosed-coop envelope	Reference Design Sheet: layout and daily-use direction; no complete construction package.	Shorter service path, but confirm bedding removal before building. This rectangle covers the enclosed coop only; a separate outdoor area still needs measuring.
6-Chicken Coop + Covered Run / 6 × 10 ft overall coop + covered-run envelope	Reference Design Sheet: layout and daily-use direction; no complete construction package.	Routine includes covered-run drainage, mesh and latch checks. Reserve usable approach to the front run gate and left-side coop service door; this arithmetic does not assign that access.
8-Chicken Walk-In Coop Plan / 12 × 8 ft overall coop + covered-run envelope	DIY Build Plan v1.1.0: 29 pages, cut and purchase schedules, staged checks.	Separate coop/run front doors; rear-floor cleaning requires both roosts removed. Keep both front approaches usable: the coop door and the independent run gate.
8-Chicken Tractor Coop / 4 × 10 ft mobile parking envelope	Reference Design Sheet: layout and daily-use direction; no complete construction package.	Routine includes repositioning, weather checks and mesh inspection. Passing one parking rectangle does not test gates, turns, grade, soft ground, handling effort or safe parking.
10–12 Chicken Shed-Style Large Coop / 8 × 10 ft enclosed-coop envelope	Reference Design Sheet: layout and daily-use direction; no complete construction package.	Designed around bedding removal, organized care zones and full-height service access. This rectangle covers the enclosed coop only; separate outdoor space is not included.

Circle a direction above. Candidate usable width: _____ ft Depth: _____ ft Date: _____

Separate outdoor area / door approach / loaded container / runoff / ground / local restrictions: _____

For a sheet carrying your selected Plan and actual measurements, open coopblueprints.com/chicken-coop-plans#choose-by-footprint, choose “Measure this Plan”, enter both dimensions and use “Print fit sheet”.
